Subject: Pilgrim Nuclear NPDES

Mr. Papadopoulos,

I am very concerned that the Pilgrim Nuclear Power Station's proposed NPDES violates the Clean Water Act and will lead to continuing harm to Cape Cod Bay.

I fully support the comments submitted by the Association to Preserve Cape Cod (APCC) concerning the NPDES draft permit for the Pilgrim Nuclear Power Station. APCC is well-respected as the leading environmental organization working to protect the Cape Cod region's waters from further degradation.

I respectfully ask and expect that you study APCC's comments very closely and explore their concerns, without political or corporate influence, as you make your determination regarding this permit.

Thank you.
